

Lichtenau, Germany, 12<sup>th</sup> February 2021

## **LS telcom AG continues to be successful**

**Lichtenau, Germany, 12.02.2021** – LS telcom AG receives an order worth EUR 1.8 million for the modernization and maintenance of a spectrum management system.

LS telcom AG is back on track for success. The Baden-based specialist for the management and planning of radio frequencies has been awarded the modernization and maintenance of a spectrum management system for a Southeast European regulatory authority. The contract has a volume of EUR 1.8 million and includes options for additional business on a substantial scale.

Due to the Covid-19 pandemic, various procurement procedures and contract conclusions had been delayed. After LS telcom AG was already able to secure several large project contracts for itself in December 2020, the company is further expanding its order backlog with this latest order. The Executive Board of LS telcom is confident that it will be able to record further similar successes in the near future.
